

Alcohol, fatigue and drug simulation goggles

Utilizing Drunk Busters America LLC deformable lenses introduced by Smart Drive Ltd, it is possible to simulate the effects of alcohol and illegal substances on human vision. These glasses are an effective tool for road safety awareness programs on the use of alcohol or substances during driving, allowing the user to experience the consequences of:

- Reduced alertness,
- The delay in reaction time,
- Confusion,
- Visual distortion,
- The alteration of depth and perceived distance,
- Reduced regional vision,
- Double vision, and
- The lack of muscle coordination.

N	Color	Characteristics	Day /Night	Photo
1	Green	Relatively low blood alcohol concentration (0.04 to 0.06)	Day	
2	Blue	Average blood alcohol concentration (0.06 to 0.08)	Night	
3	Black	High level of blood alcohol concentration (0.08 - 0.15)	Day

9	Olive	<p>According to recent U.S. Government studies, 30% of today's teenagers are smoking marijuana. About 4% of adults smoke pot at least once a year, with roughly 1% abusing it. Smoking marijuana can affect your ability to perform simple tasks, it impairs concentration and coordination, it can cause slowed reaction time, and can result in short-term memory loss. Smoking marijuana can also result in a feeling of nausea, which these goggles simulate. With several states recently legalizing marijuana, the Cannabis Goggle is a training tool which can be used with young people and with adults. 169€ per goggle, 5 year warranty. Ships within 24 hours! Introduced in January of 2014, this was the FIRST and ORIGINAL Cannabis/Marijuana Goggle on the market.</p>	Day	
10	Tie-dye	<p>Ecstasy/Molly/LSD: The fastest emerging drug problem in the USA is the use of Ecstasy, also known as Molly. Effects of using it include impaired judgment, blurred vision, confusion, a distorted perception of color, and an increase in blood pressure and heart rate. LSD stands for Lysergic Acid Diethylamide, which is a hallucinogen. Popular in the 60's and 70's, it has slowly been making a worldwide comeback. Combined with impaired depth perception, this goggle simulates effects of using Ecstasy/Molly or a bad LSD trip.</p>	Day
